R = Reflection, T = Transmission, A = Absorption · All light & solar properties have been tested internally or externally. · Gtot: measure total solar energy that passes through the glazing system and the fabric · FC-value: Relation between the total energy transmittance of glazing combined with the sun shading device gtot in combination with total energy transmittance of glazing g · Gtot and FC-value are calculated on the basis of a glass with an Ug-value of 1,6 and g-value of 0,7 according to DIN EN ISO 13363-1. · All technical properties are subjected to production-related deviations. All fabrics are in line with the REACH regulation.
