R = Reflection, T = Transmission, A = Absorption • All light & solar properties have been tested internally or externally. • Gtot: measure total solar energy that passes through the glazing system and the fabric
 • FC-value: Relation between the total energy transmittance of glazing combined with the sun shading device gtot in combination with total energy transmittance of glazing g. • All technical properties are subjected to production-related deviations. All fabrics are in line with the REACH regulation • All substances, mentioned in the icons, are not used acc. to our recipe. • Finished by a STeP certified company.
